

OBEID DENTAL

Dr. Youssef Obeid says there's one simple reason patients come to him when they need dental services—he cares.

Dr. Obeid opened his dream office in Chevy Chase earlier this year, after eight years of implants, prosthodontic and cosmetic dentistry consulting at several other offices. After earning his dental degree, he finished two years of advanced education in general dentistry, three years of prosthodontics residency at the University of Maryland Baltimore, and two years of an advanced implants fellowship at New York University. He is currently an assistant clinical professor of postgraduate prosthodontics at the University of Maryland, Baltimore.

Dr. Obeid's extensive training and experience in both implant surgery and implant restoration allowed him to provide his patients with an all-in-one practice solution for most dental implant treatments.

His office is state-of-the-art and features all-digital equipment and an onsite lab that customizes esthetics for each patient. Patients are never sent home without teeth after implant surgery but are given temporary bridges and crowns. Dr. Obeid also offers services such as full mouth reconstruction, veneers, implant dentures, smile rejuvenation, teeth whitening and treatment of traumatic injury to the mouth.

Dr. Obeid's Web site is www.obeiddental.com, and features an extensive FAQ section and a virtual tour of the office, to help make patients comfortable before they arrive for treatment.
